Issue #2

July 2023

## Project meetings

Two project meetings have taken place so far. The kick-off meeting was organized in April 2022 in the form of transnational project meeting in Yecla in Spain. The second project meeting was held in Opole (Poland) in April 2023.

At the kick-off meeting, the consortium focused on planning the project activities and their timing, as well as necessary management and administrative issues. The second meeting provided an opportunity to present and discuss important points related to the development of the first project outputs – the training materials and the educational platform.

## Key Project Results

### Collaborative Training Platform

- Analysis on Current Needs for Manufacturing Sectors Waste Management
- Joint Curriculum and Educational Philosophy
- E-learning training platform of the VET course enabling the use of STEAM education, game-based learning, remote experimentation and learning analytics

### Training Content Development

Preparation of didactic materials and pilot action with auto evaluation and feedback.

### Blueprint for the Implementation of Circular Economy in Manufacturing Sectors

The goal is to spread CROCEMS results in order to foster manufacturing companies' knowledge on both circular business models and Cobots solutions.
